PROFILE

To be part of an organization where I can apply my skills and continuously learn new technologies to adopt toward changing industrial environment and contribute to the growth of the organization.

PROJECTS

1. Student Corner

- This project is related to the social media website in which we can create accounts and make the friends.
- We can post pictures, images etc.
- We can chat with the friends, can have discussion related to any college activity, can share any exam related schedules, etc using this website.
- Framework used React, MongoDB, Node.js.

2. AI Desktop Voice assistant

- This is virtual voice assistant that I have made using Python.
- It can open any youtube video, any google link, any app in local device just by the user's voice.
- It can be used to search any information on Wikipedia just by giving vocal commands to the system.
- It can control audio commands of the device such as volume controls, mute, unmute.
- Can tell us current temperature.
- Python libraries included such as: pyautogui, pyttsx3, speech_recognition, pywhatkit, smtplib, etc

3. Personal Portfolio Website

- It is personal portfolio website made using HTML and JavaScript.
- Added style, design and hover effects using CSS.

Achievement

Shortlisted for Zensar Technologies Employability Skill Development Program
